

BOOM AIR® HOSE MANAGEMENT SYSTEM

The patented Boom Air® Hose Management System enables the user to deliver only the amount of hose needed to the aircraft.

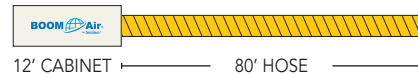

This reduces kinks and other hose related issues, resulting in optimum airflow supply to the aircraft.

The hose can be deployed or retracted by a single push of a button on the remote.

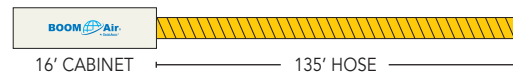

AVAILABLE MODELS

BAUB-080

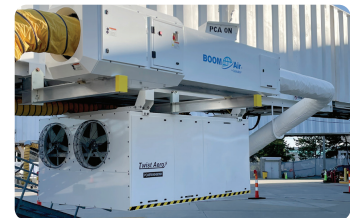

BAU-135-00

FASTER CONNECTIONS

- Remote control hose deployment & retraction
- No kinks = no restricted airflow
- Single personnel operation

RAPID ROI

- Quick & efficient connections = less APU burn
- Reduced operating costs due to less hose

SAFER WORKING ENVIRONMENT

- No dragging, pulling or lifting of heavy hoses
- Reduction of lost work days due to injury

CLEAN & UNOBSTRUCTED RAMP

- Easier snow removal
- Eliminates accidental hose ingestion
- Less hose exposure/damage
