

GROUND POWER UNITS (GPU)

Two models offered: 400 Hz 115 VAC and combination 400 Hz 115 VAC/ 28.5 VDC. Units are designed for optimal power quality, meeting MIL-STD-704F. Easy to maintain magnetic-based design.

KEY FEATURES

- Continuous 1.0 PF@ 130° F
- Stainless Steel frame w/aluminum panels
- Full bridge design
- Gas assist lifted main panels on front and rear
- External access filters
- Highly engineered airflow cooling system
- Diagnostic features on controls
- RS232 Port

SPECIFICATIONS

OUTPUT	90kW (90KVA at PF 1.0) Optional 28.5VDC
LENGTH	54"
WIDTH	60"
HEIGHT	24"
POWER	480V/60Hz/3Ph
DISCONNECT	150 AMPS
LISTING	UL 1012
RECOGNIZED STANDARD	MIL-704F Aircraft Electric Power Characteristics

MODELS

90 KVA & 28.5 VDC.

90 KVA.
